

Closed Cell Foam Glazing Tapes for Windows and Doors

EXCEPTIONALLY STRONG

Our cellular glazing tapes are looking to form strong attachments... to residential windows and doors of all shapes and sizes. Along with their exceptional strength upon application, they're engineered to perform as long-term gaskets. Capital Tape also has a line of foam tapes for attaching grids to glass.

FEATURES

- Available in black or white foam.
- Three thicknesses: 1/16", 1/8" and 1/32".
- Easy to remove plastic liner.
- Tapes slit to custom and standard widths.

PERFORMANCE

- Approved under AAMA 810.1-92.
- Superior adhesive systems designed to meet a variety of end use requirements.

STORAGE

- Store tape in a clean area free from exposure to direct sunlight, moisture or heat. (50% Relative Humidity - under 80°F is ideal).
- Shelf life is one year under these conditions.

APPLICATION RECOMMENDATIONS

- Clean contact surfaces and make sure they are dry. Dirt, grease or other foreign matter will prevent the adhesive from creating a strong bond.
- Apply the tape using firm steady pressure. The bond is enhanced by the amount of surface contact between the adhesive and the substrate.
- Avoid touching the exposed adhesive area to limit any contamination of the adhesive surface.
- Do not stretch the tape because this will effectively reduce the thickness of the adhesive surface.
- Remove the release liner with a smooth even pull.
- After the glass unit is positioned, apply even pressure over the area where the tape has been applied.
